## 1. Progress Frontend

Untuk progress frontend, kelompok kami sudah menyelesaikan beberapa tampilan, kekurangan ini dikarenakan spesifikasi laptop yang kurang memadai sehingga agak berat untuk menjalankan device untuk flutter.

The image shows a login screen for an application named 'JogjaKuy'. At the top center is a circular logo with a purple background, featuring a yellow silhouette of a traditional Javanese house (Gedong) and the text 'JogjaKuy' in yellow. Below the logo, the text 'HI, HALLO!' is displayed in a large, bold, black font. Underneath that, 'Welcome to JogjaKuy!' is written in a smaller, regular black font. The login form consists of two white input fields with purple borders: the first is labeled 'Email' and the second is labeled 'Password'. Below these fields is a prominent purple button with the word 'Login' in white text. At the bottom of the screen, the text 'Not a member? [Register here](#)' is displayed, with 'Register here' being a blue hyperlink.

### 3. Database

untuk database, kelompok kami menggunakan php my admin dan juga menggunakan laravel. Kelompok kami membuat tabel product (wisata) yang berisikan id, deskripsi, harga, serta gambar wisata yang ada.

Catatan : sebelumnya mohon maaf, karena kami kurang memaksimalkan progress kami, hal ini dikarenakan spesifikasi laptop yang kami gunakan kurang memadai dan kami juga sedikit sibuk dengan beberapa mata kuliah yang lain dan pengerjaan Tugas Akhir. Untuk pelaksanaan COTS, kelompok kami akan coba memperbaiki project yang ada sehingga ketika pelaksanaan COTS nanti bisa dimaksimalkan.
